AIMS AND SCOPE

Namık Kemal Medical Journal is the scientific official journal of Tekirdağ Namık Kemal University School of Medicine. The journal is electronically published tri-annually (April, August, December). Articles accepted until one month before the month of publication are added to the relevant issue. The three issues form a volume.

Namık Kemal Medical Journal is an independent scientific medical journal that aims to reach its readers in electronic and open access free of charge. It is aimed to publish original articles, case reports and reviews that include the results of studies and research conducted in the fields of basic, internal and surgical medical sciences and medical nursing and passed through the peer review process.

The official publishing language of the Journal is both Turkish and English.

Namık Kemal Medical Journal (NKMJ) is indexed by **Turkish Index (TR DIZIN/ULAKBİM)**, **EBSCO Host**, **Index Copernicus**, **TürkMedline**, **Ideal Online**, **J-Gate**, **Gale** and **CAB International (CABI)**.

The Journal will not consider manuscripts any that have been published elsewhere, or manuscripts that are being considered for another publication, or are in press. Studies previously announced in the congresses are accepted if this condition is stated. If any part of a manuscript by the same author(s) contains any information that was previously published, a reprint or a copy of the previous article should be submitted to the Editorial Office with an explanation by the authors.

The Editor and the member of the Associate Editorial Committee have right not to publish or send back to author(s) to be amended, edit or reject the manuscript. For further review, Editor or Editorial Board members send the article to the referee(s). The review process is double-blind. If necessary, author(s) may be invited to submit a revised version of the manuscript. This invitation does not imply that the manuscript will be accepted for publication. Revised manuscripts must be sent to the Editorial Office within 32 days, otherwise they will be considered as a new application. The corresponding author will be notified of the decision to accept or reject the manuscript for publication.

Statements and suggestions published in manuscripts are the authors' responsibility and do not reflect the opinions of the Editor and the Associate Editorial Board members.

All scientific responsibility for the articles belongs to the authors. The name order of the submitted articles should be a joint decision. The responsible author is considered to accept the author order in the name of all authors by signing the "Copyright Transfer Form". Anyone who does not meet the criteria for authoring but has contributed to the study can be listed in "Acknowledgements". The authors should declare in writing that the article is an original paper that has not been published before and that they will not attempt to publish it somewhere else during the evaluation process.

The authors are considered to have accepted any changes and corrections made by the editor as long as the scientific content is not changed. The articles sent are not returned whether published or not, and only images and figures that are not published can be returned to the author upon request.

Editorial Policies and Peer Review Process

The editorial and publication processes of the journal are shaped in accordance with the guidelines of the International Council of Medical Journal Editors (ICMJE), the World Association of Medical Editors (WAME), the Council of Science Editors (CSE), the Committee on Publication Ethics (COPE), the European Association of Science Editors (EASE), and National Information Standards Organization (NISO). The journal conforms to the Principles of Transparency and Best Practice in Scholarly Publishing (doaj.org/bestpractice).

Originality, high scientific quality, and citation potential are the most important criteria for a manuscript to be accepted for publication. Manuscripts submitted for evaluation should not have been previously presented or already published in an electronic or printed medium. The journal should be informed of manuscripts that have been submitted to another journal for evaluation and rejected for publication. The submission of previous reviewer reports will expedite the evaluation process. Manuscripts that have been presented in a meeting should be submitted with detailed information on the organization, including the name, date, and location of the organization.

Manuscripts submitted to Namık Kemal Medical Journal will go through a double-blind peer-review process. Each submission will be reviewed by at least two external, independent peer reviewers who are experts in their fields in order to ensure an unbiased evaluation process. The editorial board will invite an external and independent editor to manage the evaluation processes of manuscripts submitted by editors or by the editorial board members of the journal. The Editor in Chief is the final authority in the decision-making process for all submissions.

An approval of research protocols by the Ethics Committee in accordance with international agreements (World Medical Association Declaration of Helsinki "Ethical Principles for Medical Research Involving Human Subjects," amended in October 2013, www.wma.net) is required for experimental, clinical, and drug studies and for some case reports. If required, ethics committee reports or an equivalent official document will be requested from the authors. For manuscripts concerning experimental research on humans, a statement should be included that shows that written informed consent of patients and volunteers was obtained following a detailed explanation of the procedures that they may undergo. For studies carried out on animals, the measures taken to prevent pain and suffering of the animals should be stated clearly. Information on patient consent, the name of the ethics committee, and the ethics committee approval number should also be stated in the Materials and Methods section of the manuscript. It is the authors' responsibility to carefully protect the patients' anonymity. For photographs that may reveal the identity of the patients, signed releases of the patient or of their legal representative should be enclosed.

All submissions are screened by a similarity detection software (iThenticate by CrossCheck).

In the event of alleged or suspected research misconduct, e.g., plagiarism, citation manipulation, and data falsification/fabrication, the Editorial Board will follow and act in accordance with COPE guidelines.

Each individual listed as an author should fulfill the authorship criteria recommended by the International Committee of Medical Journal Editors

AIMS AND SCOPE

“Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals (ICMJE Recommendations)” (2013, <http://www.icmje.org/>). The ICMJE recommends that authorship be based on the following 4 criteria:

1. Substantial contributions to the conception or design of the work; or the acquisition, analysis, or interpretation of data for the work;
2. Drafting the work or revising it critically for important intellectual content;
3. Final approval of the version to be published;
4. Agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

In addition to being accountable for the parts of the work he/she has done, an author should be able to identify which co-authors are responsible for specific other parts of the work. In addition, authors should have confidence in the integrity of the contributions of their co-authors.

All those designated as authors should meet all four criteria for authorship, and all who meet the four criteria should be identified as authors. Those who do not meet all four criteria should be acknowledged in the title page of the manuscript.

Namik Kemal Medical Journal requires and encourages the authors and the individuals involved in the evaluation process of submitted manuscripts to disclose any existing or potential conflicts of interests, including financial, consultant, and institutional, that might lead to potential bias or a conflict of interest. Any financial grants or other support received for a submitted study from individuals or institutions should be disclosed to the Editorial Board.

The Editorial Board of the journal handles all appeal and complaint cases within the scope of COPE guidelines. In such cases, authors should get in direct contact with the editorial office regarding their appeals and complaints. When needed, an ombudsperson may be assigned to resolve cases that cannot be resolved internally. The Editor in Chief is the final authority in the decision-making process for all appeals and complaints.

Open Access Statement and Article Submission Charges

Namik Kemal Medical Journal provides open access to scientific publications. The full texts of the articles are available free of charge right after the journal is published.

No fees are charged from authors for article submission, processing or publication.

Readers can download articles, case reports and reviews free of charge for academic / educational use. The journal is free for everyone at any time. In order to achieve this, the journal benefits from the financial resources of Tekirdağ Namık Kemal University and the ongoing voluntary efforts of the editors and referees.

Open Access Policy is based on rules of Budapest Open Access Initiative (BOAI) <http://www.budapestopenaccessinitiative.org/>.

By “open access” to [peer-reviewed research literature], we mean its free availability on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the full texts of these articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose, without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself. The only constraint on reproduction and distribution and the only role for copyright in this domain, is given to authors to retain control over the integrity of their work and the right to be properly acknowledged and cited.

Copyright Issues

Namik Kemal Medical Journal enables the sharing of articles according to the Attribution-NonCommercial-Share Alike 4.0 International (CC BY-NC-SA 4.0) license. This means that the authors and readers are free to copy and redistribute the material in any medium or format and remix, transform, and build upon the material as long as they follow the licensing terms which include giving appropriate credit, nor using the material for commercial purposes and if remixing, transforming, or building upon the material, they must distribute the contributions from the journal under the same license as the original

Namik Kemal Medical Journal is licensed under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License (CC-BY-NC-ND).

INSTRUCTIONS TO AUTHORS

Namık Kemal Medical Journal is the official journal of Tekirdağ Namık Kemal University Faculty of Medicine. Original articles, case reports, and short communications related to the either basic or extended clinical experience in medical sciences (i.e general medicine, basic medical sciences, surgical sciences) will be considered for publication. Review articles will be accepted upon request of the editorial board. The journal does not accept unsolicited review articles for consideration.

This is an open access journal which means that all content is freely available without charge to the user or his/her institution. Users are allowed to read, download, copy, distribute, print, search, or link to the full texts of the articles in this journal without asking prior permission from the publisher or the author. This is in accordance with the BOAI definition of open access.

The journal accepts articles written either in Turkish or English. The journal is currently published quarterly (four issues) comprising one volume per year.

Namık Kemal Medical Journal is a scientific journal that aims to reach all relevant national and international medical institutions and persons in print and electronic form free of charge.

Namık Kemal Medical Journal gives priority to publishing original research articles since it has the mission to announce and share the research to the international scientific circles in Turkey and to contribute to the promotion of Turkey in this context.

Namık Kemal Medical Journal, the Publisher, and the Editors assume no responsibility for the statements in the articles; authors carry the scientific and legal responsibilities of their own articles. The manuscript which is submitted to the journal must not contain previously published material or material under consideration for publication elsewhere. Accepted manuscripts become the property of Namık Kemal Medical Journal and may not be republished. All manuscripts will undergo peer review. A final review and a subsequent decision relative to publication will then be made by the editorial board of Namık Kemal Medical Journal.

Namık Kemal Medical Journal does not charge any article processing or submission fees to the authors.

Publication Language

Articles are published in Turkish or English. In Turkish articles, the integrity of the Turkish language should be preserved and the Spelling Guide and Turkish Dictionary of the Turkish Language Association should be taken as basis.

In the use of medical terms, care should be taken to use "Turkish Science Terms" as much as possible. For this, the "Medical Terms Guide" of the Turkish Language Institution is the main source book, but when this book cannot be obtained, the "Country Medical Terms Dictionary" can be used. The authors are deemed to have accepted the changes to be made by the editor in Turkish articles, provided that no changes are made in the content.

English texts should be clear and accurate. In case the publication is accepted, the article is reviewed by the language editor of the journal.

Article Submission

All manuscripts should be submitted via <https://jag.journalagent.com/nkmj/> online submission system.

Manuscript Evaluation

As a first step, manuscripts received are evaluated with regards to the instructions to authors. The approved articles are delivered to Editorial Board. The Editorial Board evaluates the context of articles and sends them to two referees in related fields. A final review and a subsequent decision relative to publication will then be made by the editor. The articles which are accepted by the Editorial Board, come in the list of publication and the authors of these articles are informed.

This journal uses double-blind peer review, which means that both the reviewer and author identities are concealed from the reviewers, and vice versa, throughout the review process. To facilitate this, authors need to ensure that their manuscripts are prepared in a way that does not give away their identity.

Manuscript Layout

Manuscripts sent to the editor to be published in the journal must be written on one side of the A4 page, in Arial, 10 pt, double spacing and 2.5 cm margins each. The abbreviations used should be written clearly in parentheses at the first mention in the text, and no special abbreviations should be made. Numerical data between 1-10 in the text should be indicated in writing (in both treatment groups, second day), with 10 and above numbers. However, numbers between 1-10, which have a descriptive tag, should be written in writing (... 1 year) and the numbers at the beginning of the sentence (a fifteen-year-old female patient).

The title page, abstract, text, figures, tables and references of the article should be given in the same WORD file.

All visual elements except the table should be named as "Figure". Table and Figure numbering (1,2,3 ..) should be made. The description text for the table should be placed above the table, below the figure for the figure. The abbreviations used in the table should be written clearly under the table.

The use of resources in the text should be indicated at the end of the quote and as superscript.

Title Page: On the title page; The title of the article in Turkish and English, the names and duties (academic titles) of the authors, the institution from which it was sent, if any, the institution supporting the study should be written. If the article has been communicated before in any congress, its place and date should be specified. In addition, the name, surname, addresses, telephone and fax numbers, e-mail address of the author to be corresponded and Ethics Committee Approval must be clearly written on this page.

Author's name (Only the first letter is capital) surname (all text is capital) should be written clearly,

Abstracts: It should be prepared on a separate page in Turkish and English. The abstract should reflect the article, significant results should be given and their interpretation should be made. Abbreviations that are not explained in the abstract should not be used, and the source should not be shown. Abstracts should not exceed 250 words.

In research articles; Turkish and English abstracts should be divided and structured as follows:

Aim/Amaç, Materials and Methods/Gereç ve Yöntem, Results/Bulgular, Conclusion/Sonuç.

Structured abstract should not be used in reviews and case reports.

INSTRUCTIONS TO AUTHORS

Keywords: Turkish and English keywords should be found in accordance with the standards of "Index Medicus: Medical Subject Headings (MeSH)". (<http://www.nlm.nih.gov/mesh/authors.html>). Keywords should be given at least 3 and at most 5 on the page under the Turkish and English abstracts in all kinds of articles.

Sections: Original research articles should include Introduction, Materials and Methods, selection and description of the cases, technical information, Statistical Analysis, Results, Discussion, Study Limitations and Conclusion sections. Case reports should include Introduction, Case Report and Discussion sections.

After these chapters, "acknowledgements" can be written to those who contributed to the research or to the preparation of the article, if any. Acknowledgments are given at the end of the article before references. In this section, there are expressions of thanks for personal, technical and material assistance.

References

References should be numbered and listed according to the order in the text under the heading (References) at the end of the article. There should be no discrepancy between the list of references and the order they appear in the text.

References that have information obtained through another reference without the original appearance are not numbered, they are given in parentheses when necessary. Author (s) are responsible for the accuracy of the references. All references should be stated in the text.

The names of the journals are given in abbreviated form in accordance with Index Medicus. Journal names that are not included in the index are not abbreviated.

Examples for Writing Resources

For journals:

For the journal article in MEDLINE and abbreviated according to MEDLINE:

The first letters of the authors' surnames and names should be entered with a comma at the end without a full stop, and a period should be placed after the first name of the last author without passing to the title. If the authors are 6 authors and less, all of them should be written. If the authors are more than 6 authors, the first 6 should be written, then et al. should be used. Then the title of the article should be entered and a period should be placed at the end. The short name of the journal in MEDLINE is put at the end and a space is left after it is written; publication date semicolon; number in parenthesis, the starting number of the published pages are put in a colon, and the last page is written after the hyphen is inserted, but the numbers on the first page are not repeated on the last page.

Ozkan G, Ulusoy S, Guvercin B, Mentese A, Karahan SC, Yavuz A. A new player in chronic kidney disease mineral and bone disorder: tenascin-C. *Int J Artif Organs*. 2015;38:481-7.

For books:

West JB: *Respiratory Physiology* (2nd ed). Baltimore: Williams and Wilkins, 1974; 72-5.

For chapters taken from the book:

Sagawa K: Analysis of the CNS ischemic feed back regulation of the circulation. In: Reeve EB, Guyton AC (eds), *Physical Basis of Circulation Transport*. Philadelphia: WB Saunders, 1967; 129-139.

For online articles:

Abood S: Quality improvement initiative in nursing homes: the ANA acts in an advisory role. *Am J Nurs [Webcast]*. 2002 Jun [citation 12.08.2002]; 102 (6). Access: <http://www.nursingworld.org/AJN/2002/june/Wawatch.htm> PMID: 12394070.

For the citations from the thesis:

Kulu A. Evaluation of Quality of Life After Surgical Interventions Applied to Patients with Bladder Tumors, Trakya University, Institute of Health Sciences, Department of Nursing. Master Thesis. 2010; Edirne.

For congress papers:

Felek S, Kılıç SS, Akbulut A, Yıldız M. A case of phylgellosis with visual hallucinations. XXVI. Turkish Microbiology Congress Abstract Book, 22-27 September 2000, Antalya, Mars Printing House, 1994, p.53-6.

In Turkish sources that are not included in Index Medicus, the above examples are followed, but journal names are written without abbreviation.

Tables and Figures

Tables and figures should be numbered according to the order of appearance in the text, and should be placed in the closest section with their explanations according to the place in the text. The information given in the table should not be repeated in the text, permission should be obtained for tables taken from other sources. Figures should be drawn professionally, photographed or presented as digital prints in photographic quality. The part of the photos and pictures to be printed should be at least 9x13 cm in size and 300 DPI resolution.

Symbols, arrows or letters should contrast with the background. The magnification rate and dyeing technique used should be specified in microscopic pictures.

If human photography is to be used, either they should not be identified from the photograph or written permission should be obtained (see Ethics section). Figures and pictures should be written at the bottom, together with (1, 2, 3, ..) numbers.

Publication Review Process

All articles (Original articles, Reviews, Case Reports and Letter to the Editor) are subject to the following process:

After the formal check, articles that comply with the journal's spelling rules are directed to the editor. All applications are evaluated by the responsible editor in terms of the journal's scope, purpose and compliance with the target audience. If the article sent to Namik Kemal Medical Journal is in conformity with the formal principles, the editor is directed to two independent reviewers by providing blindness between the reviewers and authors from Turkey and/or abroad.

If the reviewers deem necessary, they approve the publication after the changes requested in the article are made by the authors.

INSTRUCTIONS TO AUTHORS

Studies coming to the journal management system pass the pre-evaluation of the editor and the editorial board within 2 weeks at the latest;

Compliance with the scope and subject areas of the journal,

Compliance with the journal spelling rules (if any, article template, font, titles, submission and bibliography style, etc.)

Publication language (abstract, sufficiency of keywords, structured self-translation, etc.).

Studies that pass the pre-evaluation stage mentioned above by the editorial board are sent to at least 2 reviewers who are experts in their field, depending on the nature of the study.

Based on the nature of the work, the referees evaluate working on the standard evaluation form.

In addition, if the reviewers wish, they can submit notes on the full text, stating their suggestions and opinions, to the editorial board.

The deadline for reviewers evaluations is 6 weeks.

After the study is sent to the reviewer, it states to the editorial board whether it can be evaluated within 2 weeks at the latest. Reviewers who do not specify are removed from the study and a new reviewer assignment is made.

The reviewer opinions for the studies guide the editorial board to make the final decision. The final decision always belongs to the editorial board.

The reviewers can give opinions for the study in 4 ways;

- Publication is acceptable
- It can be accepted for publication after corrections (It is decided by the editorial board whether the corrections have been made or not)
- After revisions I would like to see it again (The work is taken into a second round evaluation after it is submitted by its authors)
- Unpublished (Rejection)

A 3rd or 4th reviewer can be appointed to work in line with the reviewer's opinions, and this process works in the same way as the time specified above.

After the completion of the evaluation in line with the reviewer opinions, the reviewer opinions are reviewed by the editorial board (maximum 2 weeks). In this process, the aim is to adapt the articles of the authors to publication standards.

The editorial board makes the final decision in line with the reviewer opinions and suggestions and conveys the result to the study authors.

Accepted articles are sent to the correspondence author for proof control before the publication, and a reply must be given within 48 hours.

The responsibility of the ideas advocated in the articles belongs to the author.

The copyright of the published articles belongs to the journal and cannot be transferred, even partially, without the permission of the journal.

Plagiarism

Submitted articles are evaluated after plagiarism control. This evaluation contributes to the decision-making of the editorial group.

Final Checklist

- 1) Presentation page to editor
 - a. Category of the article
 - b. Information that it has not been sent to another journal
 - c. Relationship with a sponsor or a commercial company (if any)
 - d. Statistical control was made (for research articles)
 - e. Checked in terms of English
- 2) Copyright transfer form
- 3) Permit certificate if previously printed material (text, picture, table) is used
- 4) Compliance with the principles of the Helsinki Declaration in the "material and method" section in the studies with human elements, the approval of the ethics committee from their institutions and the "informed consent" from the patients.
- 5) If the animal element is used, indicating its compliance with the principles of "Guide for the Care and Use of Laboratory Animals" in the "material and method" section.
- 6) Cover page
 - a. The title of the article in Turkish and English (preferably one line each)
 - b. Authors and their institutions
 - c. Correspondence address, business phone number, GSM number, e-mail addresses of all authors
- 7) Abstracts: (Turkish and English)
- 8) Keywords: Between 3-5 (Turkish and English)
- 9) Acknowledgement
- 10) References

Ethic

Scientific Responsibility

The authors are responsible for the compliance of the articles with scientific rules.

All authors should have a direct academic and scientific contribution in the submitted article.

The name order of the authors should be a joint decision. All authors must indicate the author list on the copyright transfer form signed. The names of all authors should be included in the section under the title of the article.

All individuals who do not meet the sufficient criteria for authorship but contributed to the study can be listed in the "Acknowledgements/Information" section. Written permission must be obtained from these individuals to be specified in the acknowledgment section.

Ethical Responsibility

The authors are responsible for the compliance of the articles with the ethical rules.

Namik Kemal Medical Journal is a journal that has adopted the principle of complying with the ethical standards of the Human Experiments

INSTRUCTIONS TO AUTHORS

Committee (<https://www.wma.net/policies-post/wma-declaration-of-helsinki-ethical-principles-for-medical-research-involving-human-subjects/>), which was revised in 2013 in the 1975 Helsinki Declaration. Therefore, in the articles sent for publication, it must be stated that the ethical standards of the specified committee are complied with. In addition, approval letters from local or national ethics committees should be sent with the letter.

In the material and method section of the article, the authors must state that they carried out the study in accordance with these principles, and that they received “informed consent” from the ethics committees of their institutions and the people who participated in the study.

If “animal” was used in the study, the authors stated that they protect animal rights in their studies in line with the principles of the “Guide for the Care and Use of Laboratory Animals” (www.nap.edu/catalog/5140.html) in the material and method section of the article and they have obtained approval from the ethics committees of their institutions. They must notify in writing whether they comply with institutional and national guidelines on the care and use of laboratory animals.

The editor and the publisher do not give any guarantees and accept no responsibility for the features and explanations of the commercial products published in the journal for advertising purposes. If the article has a direct or indirect commercial connection or financial support for the study, the authors; On the resource page, the used commercial product, drug, pharmaceutical company, etc. It has to report that it has no commercial relationship with or what kind of relationship (consultant, other agreements) it has.

In the studies requiring the permission of the Ethics Committee, the information about the permission (Name of the Committee, Date and Approval Number) should be included in the Method section and also in the first/last page of the article. This information should be included in the Title Page when submitting your article. At the same time, you must send the Ethics Committee Form of the article.

Confidentiality and Confidentiality of Patients and Study Participants

Privacy cannot be impaired without permission from patients. Descriptive information such as patients' names, initials or hospital numbers, photographs and family tree information, etc. They are not published unless absolutely necessary for scientific purposes and the patient (or parent, or guardian) gives written informed consent.

The informed consent should also be stated in the article.

Copyright Notice

Studies submitted to Namik Kemal Medical Journal for publication should be original studies that have not been published in any way before or sent to be published elsewhere.

The authors transfer their rights to reproduce in accordance with Article 22 of the Law on Intellectual and Artistic Works numbered 5846, to disseminate in accordance with Article 23 and to transmit to the public on all kinds of carrier materials or electronically in accordance with Article 25 to Namik Kemal Medical Journal. Authors agree to waive the copyright of their work and transfer the copyright of their accepted work to Namik Kemal Medical Journal. Namik Kemal Medical Journal Editorial Board is authorized to publish the study.

However, the authors reserve the following rights:

- All registered rights other than copyright,
- The right to reproduce the work for its own purposes, provided that it is not sold,

The author's right to use all or part of the work in his future works, such as books and lectures, provided that the journal is indicated in the bibliography.

- The right to use the work ID on personal websites, provided that you specify the full text access address

Authors who will submit a study to Namik Kemal Medical Journal must complete the following steps by filling out the “Copyright Transfer Form” document.

The copyright transfer form is printed, signed, filled and scanned,

The scanned form is loaded on the system during the online article submission steps, in the additional file upload step,

The works of the authors who do not submit the Copyright Transfer Form will definitely not be published.

International Study Design Guidelines

Preparation of research articles, systematic reviews and meta-analyses must comply with study design guidelines:

CONSORT statement for randomized controlled trials (Moher D, Schulz KF, Altman D, for the CONSORT Group. The CONSORT statement revised recommendations for improving the quality of reports of parallel-group randomized trials. JAMA 2001; 285: 1987-91) (<http://www.consort-statement.org/>);

PRISMA statement of preferred reporting items for systematic reviews and meta-analyses (Moher D, Liberati A, Tetzlaff J, Altman DG, The PRISMA Group. Preferred Reporting Items for Systematic Reviews and Meta-Analyses: The PRISMA Statement. PLoS Med 2009; 6(7): e1000097.) (<http://www.prisma-statement.org/>);

STARD checklist for the reporting of studies of diagnostic accuracy (Bossuyt PM, Reitsma JB, Bruns DE, Gatsonis CA, Glasziou PP, Irwig LM, et al., for the STARD Group. Towards complete and accurate reporting of studies of diagnostic accuracy: the STARD initiative. Ann Intern Med 2003;138:40-4.) (<http://www.stard-statement.org/>);

STROBE statement, a checklist of items that should be included in reports of observational studies (<http://www.strobe-statement.org/>);

MOOSE guidelines for meta-analysis and systemic reviews of observational studies (Stroup DF, Berlin JA, Morton SC, et al. Meta-analysis of observational studies in epidemiology: a proposal for reporting Meta-analysis of observational Studies in Epidemiology (MOOSE) group. JAMA 2000; 283: 2008-12).
